

Atal Bihari Vajpayee Vishwavidyalaya, Bilaspur (C.G.)

Scheme and Syllabus

of

M.A. (Economics) **Program Code: MAECOP105**

Annual system for affiliated college
(As per LOCF and credit system)

w.e.f. 2023-2024

(As approved by AC and EC meetings held on 16.08.2023 and 18.04.2023 respectively)

Atal Bihari Vajpayee University Bilaspur (C.G.)

Koni in front of Police Station Bilaspur- Ratanpur Road, Koni Bilaspur (C.G.) 496009

Website: www.bilaspuruniversity.ac.in

Scheme of M.A. (Economics) Private PROGRAM CODE: MAECOP105					
Year	Course Code	Subject Name	Marks		
			Total		
			Max	Min	
M.A. Previous (Economics) Compulsory papers					
I	ECOT101	Micro Economic Analysis	100	36	
	ECOT102	Quantitative Methods	100	36	
	ECOT103	Indian Economic Policy	100	36	
	ECOT104	International Trade and Finance	100	36	
	Optional Papers (Choose any one Group :)				
	ECOT105	Group: A-1 Industrial Economics	100	36	
	ECOT106	Group: B-1 Labor Economic	100	36	
	ECOT107	Group: C-1 Demography	100	36	
	ECOT108	Group: D-1 Agriculture Economics	100	36	
	ECOT109	Group: E-1 Computer Application in Economic Analysis	100	36	
	Subtotal		500	-	
M.A. Final (Economics) Compulsory papers					
II	ECOT201	Macro-Economic Analysis	100	36	
	ECOT202	Public Finance	100	36	
	ECOT203	Economics of Growth	100	36	
	ECOT204	Environmental and Welfare Economics	100	36	
	Optional Papers (Choose any paper of any other group :)				
	ECOT205	Group: A-1 Industrial Economics	100	36	
	ECOT206	Group: B-1 Labor Economic	100	36	
	ECOT207	Group: C-1 Demography	100	36	
	ECOT208	Group: D-1 Agriculture Economics	100	36	
	ECOT209	Group: E-1 Computer Application in Economic Analysis	100	36	
	Subtotal		500	-	
	Total		1000	-	

Note: At Post-graduate level, candidate required to study eight compulsory papers and two optional papers during two year period. There shall be four papers compulsory and one optional paper in M.A. previous and four compulsory and one optional paper (other than studied in M.A. Previous) in M.A. final examinations. Each paper shall carry 100 marks.

Apart from the group of optional paper in M A. Previous, any other group will have to be selected in M. A . Final.

As approved by academic council and executive council meetings

M.A. ECONOMICS

Program Outcome

The Master of Arts in Economics Program aims to provide Students with a Comprehensive understanding of economic theory, Principles and Practical applications, upon completion of the program. students are expected to:

- PO1:** Possess a deep understanding of microeconomics, macroeconomics, econometrics and quantitative research methods.
- PO2:** Be able to analyze complex economic issues and develop solutions using economic theory and empirical analysis.
- PO3:** Demonstrate critical thinking, problem solving and analytical in evaluating economic policies and issues.
- PO4:** Be able to apply economic theory and empirical analysis to real-world problems in fields such as finance, international trade, developmental economic public policy and environmental economics.
- PO5:** Possess effective communication and writing skills to convey complex economic concepts and ideas to a variety of audiences.
- PO6:** Be prepared for further studies in economics or related fields or for careers in government, non-profit organizations and the private sector.
- PO7:** Students should understand the importance of professionalism and ethical behavior in the field of economics and be able to apply these principles in their work Overall the program outcomes of M.A. economics programs are designed to equip students with the skills and knowledge necessary to succeed in the variety of roles related to economics, the program equips students with a strong foundation in economics and prepares them to make meaningful contribution in various fields that require economic expertise.

Atal Bihari Vajpayee University Bilaspur (C.G.)

Koni in front of Police Station Bilaspur- Ratanpur Road, Koni Bilaspur (C.G.) 495009

Website: www.bilaspuruniversity.ac.in

Program Specific Outcomes

- PSO1:** Develop in the students' ability to explain core economic terms, concepts and theories explain the function of market and prices as AL locative mechanism, apply concepts of equilibrium, identify and explain major types of market failures.
- PSO2:** Enable the students to understand the scope of the subject.
- PSO3:** Enable the students to collect data and make them able to face the problem while collecting data.
- PSO4:** To prepare them to apply economic theories and concepts to contemporary social issues as well as formulation and analysis of policy (describe how economic trade-offs and social values impact public/private social policy and the success or failure of policies to achieve intended outcomes)
- PSO5:** To inculcate in students, a deeper understanding of economic theory and have the opportunity to apply economic principles to a number of areas including finance, urban, labour economics agricultural economics, public finance and international trade.

As approved by academic council and executive council meetings

Part A: Introduction		
Program: M.A. Previous		Year: 1 w.e.f.: 2023-2024
1.	Course Code	ECOT101
2.	Course Title	MICRO ECONOMIC ANALYSIS
3.	Course Type	Theory
4.	Course Learning Outcomes (CLO)	<p>By the end of the course, the students will be able to understand:</p> <ul style="list-style-type: none"> Analytical approach to consumer behavior. The concept of production function. Consumer behaviors in real life. The students will learn economic model and diagrams to analyze the microeconomics. The course will encourage students to think critically and apply logical reading to economic problems.
5.	Total Marks:100	Min Passing Marks:36

Part B: Content of the Course	
Unit	Topics
I.	Introduction Demand and supply analysis- Basic Economic Problem deductive and Inductive methods of analysis, Elasticity of demand (price, cross, income), Elasticity of supply, Theories of demand- utility, Indifference curve (Income and substitution effects Slutsky theorem, compensated demand curve) and their application, Revealed preference theory, Revision of demand theory of Hicks, Consumer's surplus.
II.	Theory of production, cost and revenue- Production function- Short period, and long period, law of variable proportion and returns to scale Isoquants- Least cost combination of inputs, Economies of scale, Elasticity of substitution, Euler's theorem, Technical Progress, and Production function Cobb- Douglas, cost and revenue analysis.
III.	Price and Output determination- Price & output determination- Perfect Competition - short run and long run, Equilibrium of the firm and industry, monopoly- Price and output equilibrium under monopoly, price discrimination, monopoly control and regulation, monopolistic competition- General and Chamberlin approaches to equilibrium and selling costs.
IV.	Oligopoly- Non-collusive (Curnot, Bertrand, Kinked demand curve) and collusive (Cartels mergers & Price leadership) Baumols sales revenue maximization model, Baines limit pricing theory
V.	Distribution- Marginal Productivity theory of distribution, the adding up problem, Rent- Recardian and modern theory, Theory of Interest and IS-LM Curve model Theory of wages- wage determination under perfect and imperfect conditions, Theories of profit, risk, uncertainty and innovation theory. Welfare Economics and General Equilibrium-Pigouvian welfare economics, pareto optional condition, Social welfare function, compensation principal, theory of second best-Arrow's impossibility theorem, partial and general equilibrium, Walrasian excess

As approved by academic council and executive council meetings

Part A: Introduction		
Program: M.A. Previous		Year: 1
w.e.f.: 2023-2024		
1.	Course Code	ECOT102
2.	Course Title	QUANTITATIVE METHODS
3.	Course Type	Theory
4.	Course Learning Outcomes (CLO)	<p>By the end of the course, the students will be able to understand:</p> <ul style="list-style-type: none"> • Measurement of Skewness and correlation. • Measurement of regression analysis and interpolation and extrapolation. • Measurement of Probability. • Measurement of Index Number. • Students will learn how to collect, organize and analyse data using various quantitative techniques.
5.	Total Marks:100	Min Passing Marks:36

Part B: Content of the Course	
Unit	Topics
I.	Concept and types of production functions cob Douglas production function; programming- Basic concept, formulation of a linear programming problem its structure and variables; nature of feasible, basic and optimal solution; concept of game; strategies- simple and mixed; value of game; saddle point solution; simple applications, limitations and game theory.
II.	Skewness- Symmetrical and asymmetrical distribution; measurement of skewness- Karl Pearson's coefficient of skewness Bowley's coefficient of skewness; meaning assumptions and limitation of simple correlation; measurement of correlation. Karl Pearson's coefficient of correlation and spearman's rank correlation, probable error and standard error in correlation; Regression analysis- regression lines regression equation, regression co-efficient, partial correlation and multiple correlation; multiple regression analysis (up to two variables) standard error of the estimates.
III.	Interpolation and extrapolation- Methods of fitting a parabolic curve direct Bio Mail expansion method, Newton's advancing difference method and Lagrange methods, association of attributes, meaning and types of association, consistency of data association, Theory of probability- various types of events, addition and multiplication theorems conditional probability and concept of inter dependence.
IV.	Index Number- Type of index number, Fisher's Ideal Index number, Reversibility text cost of living index, Time series data Analysis- Components of time series. Short period and long period trend line; moving average least Square method.
V.	Census and sample methods of statistical inquiry- Deliberate and random, sample, random, stratified random and P.P.S.nsampling, Concept of an estimator its sampling distribution; desirable properties of an estimator, formulation of statistical hypothesis null and alternative; goodness of fit. Confidence intervals and level of significance.

Part A: Introduction		
Program: M.A. Previous	Year: 1	w.e.f.: 2023-2024
1. Course Code	ECOT103	
2. Course Title	INDIAN ECONOMIC POLICY	
3. Course Type	Theory	
4. Course Learning Outcomes (CLO)	By the end of the course, the students will be able to understand: <ul style="list-style-type: none">• GDP and National Income of India - Components and structure of GDP and National Income.• Objectives and strategies of Planning in India.• Demographic features of Indian population.• Agriculture development in India.• Issues of food security policies.	
5. Total Marks:100	Min Passing Marks:36	

Part B: Content of the Course	
Unit	Topics
I.	Economic development and its determinants- Approaches to economic development and its measurement sustainable development; Role of State market and other institutions, Indicators of development- PQLI, Human Development Index (HDI) gender Development indices.
II.	Planning in India- Objectives and strategy of Planning; Failures and achievements of Plans; Developing grass-root organization for development Panchayats, NGOs and pressure groups.
III.	Demographic features, poverty and inequality- Broad demographic features of Indian population; Rural- urban migration; Urbanization and civic annuities; poverty and Inequality.
IV.	The agricultural sector- Institution Structure- Land reforms in India; Technological change in agriculture- pricing of agriculture Input and output, Terms of trade between agriculture and Industry, Agriculture finance policy, agriculture marketing and Warehousing, issues in food security policies for sustainable agriculture
V.	The industrial sector- Industrial policy; public sector enterprises and their performance, Problem of sick units in India; Privatization and disinvestment debate growth and pattern of industrialization Public finances & banking- Fiscal federalism: Centre- state financial relation: Finances of central government, Finances of state government; fiscal sector reforms in India, Review of monetary policy of RBI. External sector & economic reforms- Issues in export- import policy and FEMA. Exchange rate policy foreign capital and MNCs in India, the progress of trade reforms in India

Part A: Introduction		
Program: M.A. Previous	Year: 1	w.e.f.: 2023-2024
1. Course Code	ECOT104	
2. Course Title	INTERNATIONAL TRADE AND FINANCE	
3. Course Type	Theory	
4. Course Learning Outcomes (CLO)	By the end of the course, the students will be able to understand: <ul style="list-style-type: none">• Nature, scope and importance of International Economics.• Theories of international trade.• Theory of intervention.• Balance of payment and foreign trade.• Students will examine regional disparities and economic imbalances within India.	
5. Total Marks:100	Min Passing Marks:36	

Part B: Content of the Course	
Unit	Topics
I.	Theory of International trade- Meaning and distinguishing features of inter-regional and international trade. Difference and similarities between inter regional and international trade. Smith's theory of absolute advantage, Ricardo's theory of comparative cost and Haberle's opportunity cost theory, Mill's theory of reciprocal demand, offer curve analysis. Heckscher- Ohlin theory of international trade, factor price equalization, Stolper Samuelson and Rybozynski theorms
II.	Measurement of gains and theory of interventions- Measurement of gains from trade and concept of trade, their limitations, Determination of terms of trade and policy implications for less developed countries; Trade as an engine of economic growth. The theory of interventions (Tariff, Quotas and non-tariff barriers) Economic effects of Tariff Quotas on national income, output, consumption, price, employment, Terms of trade and income distribution. Dumping- type, objective and effects of dumping, current incidence of dumping in India and its impact on our economy, Anti-dumping measures.
III.	Balance of payment- Meaning and components of balance of payment (BOP), Equilibrium and disequilibrium in the B.O.P. Measures to correct the abverse BOP. Marshall- Lerner's conditions under devaluation, expenditure switching policies and direct control, Theories of Exchange Rate- Equilibrium Exchange Rate free Market theory of Exchange Rate, Concept of foreign Exchange Rate, The Purchasing Power parity theory. Balance of payments theory, Spot and forward Exchange Rates, Fixed and Flexible Exchange Rates, their Merits & demerits

As approved by academic council and executive council meetings

Part A: Introduction				
Program: M.A. Previous		Group: C-1	Year: 1	w.e.f.: 2023-2024
1.	Course Code	ECOT107		
2.	Course Title	DEMOGRAPHY		
3.	Course Type	Theory		
4.	Course Learning Outcomes (CLO)	By the end of the course, the students will be able to understand: <ul style="list-style-type: none">• Meaning and importance of demographic features in economy.• Theories of Population.• Meaning and measurement of fertility.• Theory of demographic transition.• Meaning of mortality and factor responsible for birth rate, Death rate and Infant mortality rate.		
5.	Total Marks:100	Min Passing Marks:36		

Part B: Content of the Course	
Unit	Topics
I.	Demography- Meaning, Scope and importance of demography sources of demographic data. Tools of demography analysis, measurement of population growth and population pyramid;
II.	Theories of population- Malthus theory, Socio-culture and economic theories of populations. Biological theories of population. Theory of optimum population, Theory of demographic transition
III.	Fertility- Meaning and definition of fertility, Measurement of fertility-child woman ratio, crude birth rate, corrected birth rate, General fertility rate, Age specific fertility rate, Total fertility rate, Gross reproduction rate, and Net reproduction rate, calculation of fertility rates, determination of fertility, Trends fertility in India.
IV.	Mortality and morbidity- Importance of mortality data, causes of death, meanings of morbidity, Differentials in mortality and morbidity, measurement of mortality crude death rate, Age-specific death rate, Infant mortality rate, Standardized death rate and maternal mortality rate, calculation of mortality rates, Trends in mortality in India, life table. Migration and urbanization, Population projection, growth of population in India, Population and economic development, Population explosion in India, Demographic characteristics of developing countries. Population policy of India
V.	Women Empowerment- Economics status, Women in decision making, Women and labour market, Evolution of population policy in India- The shift in policy from population control to family welfare, to women empowerment; Family planning strategies and their outcomes; The new population policy; Tasks before the National Population Commission.

Program: M.A. Previous	Group: E-1	Year: I	w.e.f.: 2023-2024
1.	Course Code	ECOT109	
2.	Course Title	COMPUTER APPLICATION IN ECONOMIC ANALYSIS	
3.	Course Type	Theory	
4.	Course Learning Outcomes (CLO)	<p>By the end of the course, the students will be able to understand:</p> <ul style="list-style-type: none"> • Computer software and tools commonly used in economic analysis. • Computer programming languages to conduct economic analysis. • Elementary knowledge about computer and data processing. • Techniques and methods tables, graphs and frequency series. • The data storage and data operations. 	
5.	Total Marks:100	Min Passing Marks:36	

Part B: Content of the Course	
Unit	Topics
I.	Introduction to computer and peripherals- Basic components of computer- CPU, input- device, Keyboard, Mouse and Scanner, Video Display, Printer and Plotters, Data storage and retrieval, hard disk, floppy disk and CD ROM. Types of computers and their applications, computers networking and resources sharing hardware, Software and firmware, examples and techniques in programming languages elementary Knowledge only.
II.	Data processing, techniques and Algorithms concepts of Data, record and file- Types of data and data structure, data analysis, file handling and operations like opening, appending and cascading, closing and attribute control, data storage and retrieval, data operations algorithms like sorting, merging, joining and bifurcation database concepts and operation on database, DBMS and RDBMS.
III.	Statistical Processing Techniques and Methods Series; tables; Graphs and Object time and frequency series; regression methods and technique regression analysis data validation, trends and cycle city forecasting system modeling and description: system equation; specification; error and correction strategies; Statistical modeling and descriptive statistic, distribution functions, regression statistics.
IV.	I.T.s application commerce, Online Banking ATN's Electronic Stock, Exchange Electronic Trading data sharing and decimation; electronic transition; documents delivery; authentication and validation transaction; processing
V.	I.T. Application to Commerce Electronic Trading and Marketing; On line shopping and malls, B2B, B2C, and G2B, models and their applications: Document and transaction security and digital signature, integrated transition on mobile platforms.
