ABOUT ICT ACADEMICS

India is fast emerging as a world power in Information, Communications Technology and Electronics (ICTE) sectors. To complement its growth and further development, there is an ever-increasing need for trained professionals with specialization in this space. This includes training of professionals not only in existing and changing technologies but also in the fields of R&D and electronics manufacturing. This will specifically be aimed at the ICTE sector to create a substantial resource pool of talent and generate ample opportunities for entrepreneurs. Ministry of Electronics & Information Technology (Meity) has approved a scheme and setup Electronics and ICT Academies at 07 (seven) institutions viz. IIT Guwahati, IIT Kanpur, NIT Patna, IIITDM Jabalpur, IIT Roorkee and MNIT Jaipur. The Ministry had earlier setup two ICT Academies at Tamil Nadu and Kerala respectively. These Academies are aimed at faculty/mentor development and upgradation to improve the employability of the graduates, diploma holders in various streams, through collaboration of States/Union Territories. Each Academy is being provided funding support for four years and is expected to generate revenue by charging fee and taking up other activities to meet the recurring cost in a gradual manner and become self-sustainable by the end of fourth year onwards. All these Academies will cater to the requirements of identified neighbouring States and UTS also.

ABOUT REMOTE CENTER

Ministry of Electronics & Information Technology (MeitY) has approved a scheme and setup Electronics and ICT Academies at 07 (seven) institutions viz. IIT Guwahati, IIT Kanpur, NIT Patna and IIITDM Jabalpur, IIT Roorkee and MNIT Jaipur. The objective of these academies is to train students and teachers on latest technologies. The department of Computer Science and Application is associated with IIITDM academy Jabalpur since the year 2018 as nodal or remote centre to organize Faculty Development Program. The department is continuously supporting academy to conduct FDP and certificate program.

PARTICIPANTS

In this online programme on “ICT Tools for Teaching, Learning Process & Institutes” there are total approx. 157 participants had joined.

REPORT

The Faculty Development Program (FDP) on ICT Tools for Teaching-Learning and Institutions was organized by the Department of Computer Science and Application at Atal Bihari Vajpayee University, Bilaspur. This FDP was conducted in collaboration with NIT Patna, MNIT Jaipur, and IIITDM Jabalpur. It took place from August 10 to August 21, 2020, during a time when the world was grappling with the challenges posed by the pandemic, leading to lockdowns and a significant shift towards online education. The primary objective of this FDP was to introduce essential online teaching and learning tools to educators, given the new educational landscape. The FDP covered a wide range of topics crucial for the effective utilization of ICT tools in teaching and learning during the pandemic. Some of the key areas included: MOOC for content development and management, Learning Management System (LMS), Open-source tools for educational purposes., LaTeX for document preparation, ICT tools for delivering lectures, including platforms such as Cisco WebEx and Google Meet.

The FDP commenced with a joint online inaugural function, bringing together experts from all the coordinating institutes. During this session, the objectives of the FDP, particularly in the context of the pandemic, were introduced to the participants. This gathering set the stage for a productive and knowledge-sharing experience.

A total of 157 participants from the university's remote centres registered for this FDP. Throughout the one-week program, they engaged with various ICT tools and learned their applications in online teaching and learning. The FDP created a dynamic platform for educators to adapt to the evolving educational landscape and enhance their digital teaching skills.

The FDP featured expert speakers from prestigious institutions, including IITs, IIITs, and NITs. These experts delivered insightful lectures on different topics, sharing their knowledge and expertise with the participants.

Upon the successful completion of the FDP, certificates were distributed to all the participants. The coordinating academy facilitated the online delivery of these certificates, ensuring that participants received acknowledgment of their efforts and learning achievements.

In conclusion, the Faculty Development Program on ICT Tools for Teaching-Learning and Institutions was a timely and valuable initiative. In the midst of a global pandemic, it provided educators with the essential skills and knowledge to adapt to the new normal of online education. The collaborative effort of multiple institutes and the contributions of expert speakers enriched the learning experience for the participants, enabling them to leverage ICT tools effectively in the teaching-learning process. This FDP not only addressed the immediate needs arising from the pandemic but also contributed to the continuous enhancement of educational practices.
